

The GroAqua logo features the word "GroAqua" in a white, sans-serif font. The letter "A" is replaced by a stylized blue triangle with a white outline, which has a blue wave-like shape extending from its base. The background of the cover is a dark blue, semi-transparent image of a large offshore aquaculture vessel with various pipes and equipment visible.

GroBarge

Built for Extreme Environment

Designed for remote operation and tailored to your needs, GroAqua Barges combine robust engineering with our advanced GroFeeder system, handling up to 24 feed lines and 1,100 tonnes of feed.

- Increased safety
- Greater stability
- Designed for growth
- Up to 24 Feed-lines
- Front/Aft/Side Feeding
- Large Silo Capacity

Barge Refurbishment Solutions

Innovative Next Generation Aquaculture Solutions

Scalable barge solutions designed to increase capacity, improve efficiency, and perform in the toughest marine environments.

Key Capabilities:

- Capacity Expansion
- Structural Enhancement
- Advanced feeding systems
- Double side solutions
- Custom-built designs

Benefits:

- Higher output
- Better efficiency
- Increased safety
- Greater stability
- Built for growth

Service Valve

Couplings

Pipe Clamp

GroLight

Robust Underwater Lighting

- Powerful 400W output
- Engineered for harsh conditions
- 120° Beam angle
- Soft start function
- Plug & play 100-230VAC
- GroCable Suspension-ready

Solaris

80K | 40K | 6K

Deep Farming Light

- High output controllable lighting
- Robust construction
- Corrosion-free components
- Engineered for deep farming

GroSpreader

Efficient Feed Distribution

- Maintenance-free operation
- Self-cleaning bearing
- Stainless steel pipes
- Balanced load on bearing

GroCable

Heavy Duty Cable

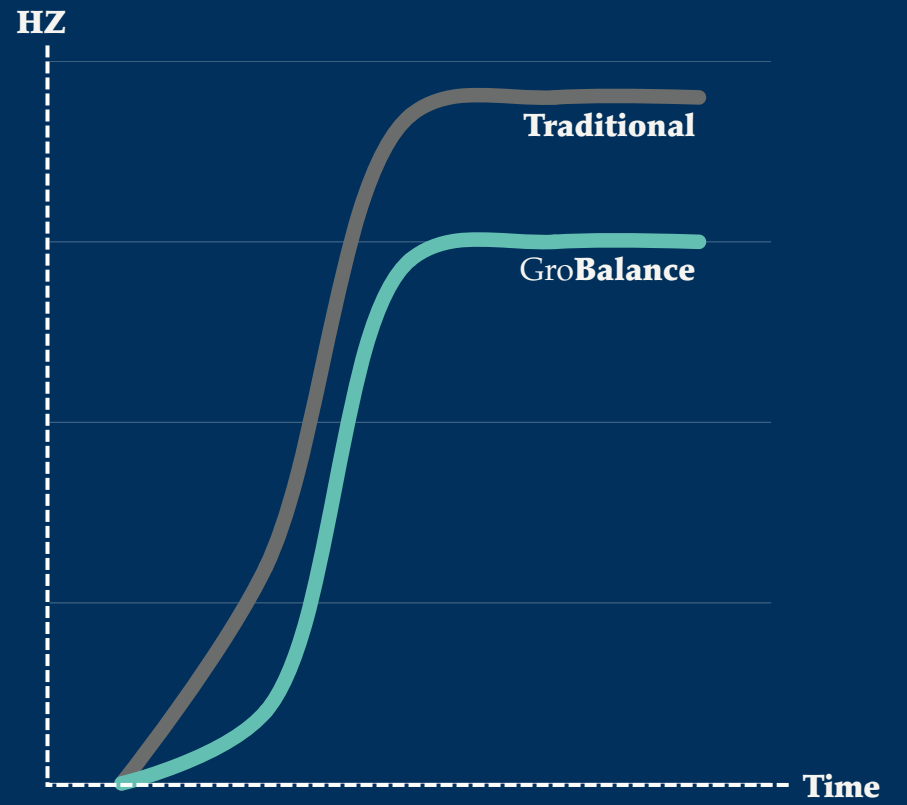

- Cage powering for exposed sites
- Superior mechanical construction
- Superior durability in Harsh environments
- Direct seawater installation
- Ranges from 1,5mm² to 35mm²

GroBalance

GroVision Pellet Detection

Digital Solution

GroVision is a software for controlling and monitoring the fish farm. We provide fish farmers the ability to optimise the feeding process and minimise feed wastage with the help of cameras, sensors and a remotely controlled feeding system.

- Fish farm feed controls and monitoring
- Real-time pellet detection
- Autonomous feeding
- Seamless integration
- Integrates with multiple cameras

GroFeeder

Digital Solution

GroFeeder is a powerful software platform for managing feeding fish. Designed to optimize feed distribution, the system enables real-time monitoring, precise control, and automated workflows. Ensuring safe feed passage and minimal pellet loss. GroFeeder can operate as a stand-alone solution or enhance existing feed systems through smart integrations, upgrades and ROC controls.

- Modern feeding software
- Integrated feed control
- Prompt Analysis and reporting
- Seamless integrations
- Hardware compatibility with other systems

GroCamera

Reliable Visual Control

- Full HD Wide-Angle Camera
- 140° fixed view
- Precise feed control
- Dedicated pellet detection camera
- Mortality monitoring camera
- Durable Ethernet cable
- Stable, high speed Ethernet connectivity
- PoE Powered

GroSensor

Plug&Play Sensor

- Seamless integration with other systems
- Temperature
- Ethernet Connectivity
- PoE Powered
- Ensure reliability via backup data
- Battery Backup

GroPower

Lift-up Inspection Camera

LiftUp/deadfish-collector camera

Havida Sense Camera

Smart Underwater Camera

- Full HD Wide-Angle Camera
- 360° view Pan/tilt
- High Intensity LED lights
- Integrated Sensors

Havida **Sense Winch**

Camera Winch System

- Versatile camera winch system
- Dynamic Operation
- Multi-camera compatibility
- Robust mechanical construction
- Reliable performance

Havida Sense Cage Central

Robust and Reliable Power

- Centralized power distribution
- Flexible connectivity
- User-friendly interface
- Durable construction
- Easy Installation
